

PROJECT FACT SHEETS

Bushveld Chrome

Metallurgical-grade chrome concentrate

Location

Eastern limb of the Bushveld Complex.

Geology

LG6 and MG chromitite reefs. Consistent grade and metallurgy.

Operations

Underground bord-and-pillar mining feeding a dense-media and spiral concentrator. Product supplied to domestic ferrochrome producers and exported to Asia.

Production

Current: 30,000 t per annum concentrate. Debottlenecking underway to reach 45,000 t.

Reserves

Mine life 20+ years.

Community

Local procurement in excess of 40% of operational spend. Skills programmes for host communities.
