

PROJECT FACT SHEETS

Northern Cape Iron Ore

Direct shipping ore operation

Location

Northern Cape Province, South Africa. Rail-linked to the Port of Saldanha.

Geology

Hematite-magnetite banded iron formation. High-grade DSO product with low deleterious elements.

Operations

Conventional open-pit truck-and-shovel. On-site dry crushing and screening to lump and fines products.

Production

Current run-rate: 180,000 t per annum. Nameplate: 220,000 t.

Reserves

Reported per JORC 2012. Mine life in excess of 15 years at current rates.

Logistics

Long-term rail slot on the iron ore export line. Dedicated stockpile and ship-loading capacity at Saldanha.
